LOL®

Any Time. Any Place. Any Device. Keep Learning!

www.BlueEyes.com.tw

Basic functions

Auto Converter

Auto Converter is designed to convert the videos for LOL. It saves your time! No matter what formats you get, just upload the video, LOL auto convert it for you!

Online Learning

LOL provides students study incessantly. Students can keep learning by using tablet PC, computer and smart phone while they are commuting. LOL allows users any device, any time, any place. Keep learning.

Copyright Protection

Static Watermark

After uploading the videos, LOL will put the static watermark to the videos automatically. This can claim the ownership of the videos.

Anti-download Technology

Anti-download technology is a mechanism to protect the videos downloading from other software. Downloading LOL videos is impossible!

Copyright Claim

Like many movie videos, LOL claims the copyright in the starting segment. It is a claim to the users that the video is protected and can't be used in illegal way.

News Publishing

News publishing is very useful! No need to email or call the students! LOL publishes this for you!

Delivery Informing

After registering the class, students will get the text books. LOL has the delivery informing function. Students can check the delivery status!

Album

LOL supports the photos uploading. These photos can also be made the album by class. You can set the album public or private!

Try-lesson

Try-lesson provides the student to try the lessons. If you like the lessons, register the classes!

Story Marketing

A good story can catch the attention of students and parents. LOL provides you can put your story on homepage.

Lecture Analysis

The administrator grabs the data to analyze what videos and when the users view. According to the viewing habit, the administrator can provide the useful information to the management.

No Limitation for Class and Course

Administrator can set different kinds of courses attract students. Also, the students can select the course. LOL will classify the course for you which saves the time on searching and management.

Class Publishing

LOL makes Class publishing easier! Just insert the information of the classes, like the introduction, teachers and lectures, you can manage the publishing!

QRcode

Students can use QRcode to enter the administrator immediately.

Administrator can choose whether there is a QRcode on the film or not. Also, administrator can put some information in QRcode, such as, course information, course related website and announcement for intellectual property rights.

Point Analysis

The administrator can collect the data that how the student use the points. According to the analysis, the teacher can assist the student to improve the studying.

Management

Student Management

This can set the students' accounts and modify students' personal information and classes.

Teacher Management

LOL manages the authority of the system, student accounts, teacher accounts, lectures, and other management. You can prevent the unauthorized modification.

Lecture Management

LOL helps you to manage the lectures. You can publish the lectures to the classes and set the points to the lectures!

User Analysis

The usage of big data can help the management to

www.BlueEyes.com.tw

understand the habits of the users. LOL applies big data to get the extra message and the connection of data. This can assist the management to understand the trend.

Login Analysis

Collecting the IP address, platforms, and browsers of users can generate the useful information. Administrator can analyze this information and improve the experience of users.

Video Encryption

LOL applies the video encryption technology to protect the videos. Without the Permission of authority, the users can't view the videos.

Management Interface

You can check all the system of LOL at management interface, including memory capacity, network status, network mode, network speed, system average load, CPU load, CPU temperature, RAM, SWAP, system capacity, online working time, HD location, saving capacity, S.M.A.R.T. status, S.M.A.R.T. information, HD type, firmware version and HD serial number.

Customize Web Interface

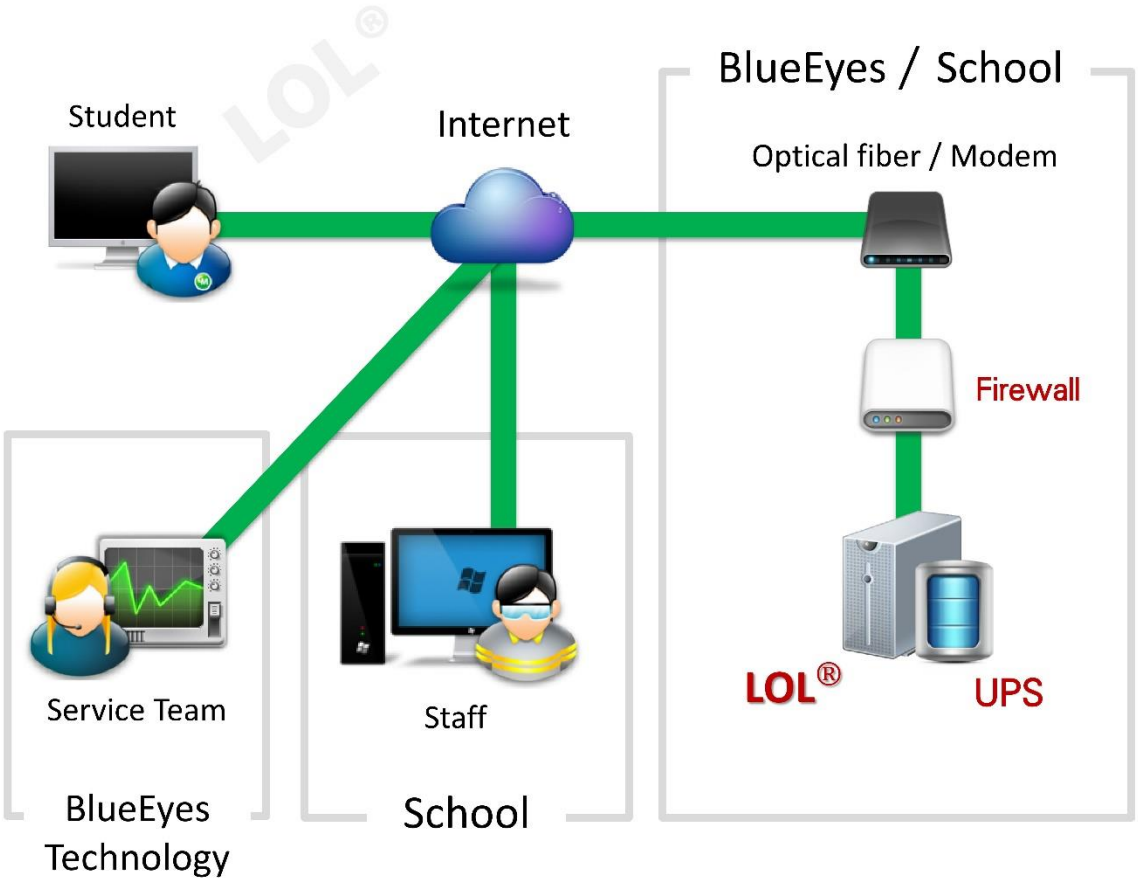
LOL®

Any Time. Any Place. Any Device. Keep Learning!

www.BlueEyes.com.tw



Before using LOL, the quality of camera is low and usually get the complaint by students. The original camera is kind of traditional one and is not suitable for education. Therefore, students can't see the words on the blackboard clearly.

Manager and teachers are satisfied with products of BlueEyes when we using SES. During the time, we usually get the shopping service from the call of BlueEyes. Furthermore, the engineers of BlueEyes provides a good service when you get into a trouble. As I know the LOL, I decided to use it without any hesitation.

Unlike other online learning platform, LOL doesn't need to install a lot of software, teachers of our school don't have to repair the system anymore. There is no more complaint phone calls from the students, either.

Undoubtedly, LOL is a useful online learning platform. It provides our students can learning at home after they come back from office. Most of our students need to participant in practical training for at least one year in other cities. Therefore, LOL solve the problem of distance. Furthermore, date countdown function of LOL is loved by teachers and students. It can remind students to study hard automatically according to the test date.

Before using LOL, our students mostly are from Taichung; however, we have many students from other countries inquire for our lesson by making a phone call and register online for the class now.
